# **Welcome to the Convenient World of 2-in-1 *Bottle Sterilizing and Drying* from Gourmia**

Thank you for purchasing a Gourmia Sterilizer and Dryer!

The pages of this manual offer comprehensive instructions to guide you through the functions and features of the Gourmia Bottle Sterilizer and Dryer. Inside this guide you will also find information on its modes of operation, complete step-by-step instructions for the operation, assembly, cleaning, and maintenance of your appliance.

Please read all safety instructions thoroughly to ensure safe usage at all times.

Thank you for your purchase. We sincerely hope you will enjoy this as well as all the many innovative products brought to you by Gourmia.

## IMPORTANT SAFEGUARDS

*Before using this product please read this manual carefully, and save for future reference.*

### SAFETY INSTRUCTIONS

*When using any electric appliance, basic precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:*

1. Never use the appliance with a damaged cord or plug or after the appliance has been damaged in any way. Contact customer service for any damages on the appliance.
2. This appliance is for adult use only. Persons under the age of 13 should not use this product.
3. Close supervision is required when any appliance is used near children.
4. Do not exceed the maximum level of water- the appliance will not work.
5. Always place the bottle sterilizer on a dry, flat surface- out of reach of children.
6. Do not move the appliance during use.
7. Do not touch the appliance while it is in use, the appliance gets very hot!
8. Beware of the hot steam which escapes from the lid.
9. Never immerse the base of the appliance in water or any other liquid.
10. For the first few uses, it is normal for the appliance to emit a scent due to high temperatures.
11. Always unplug the appliance before cleaning. Make sure the appliance is cleaned and dry before each use.
12. Do not use the appliance for anything other than its intended use.
13. This appliance is intended for household use only.

#### **Electromagnetic field (EMF)**

**This appliance complies with all standards relating to electromagnetic fields (EMFs). It meets the safety rules established on the basis of current scientific knowledge provided it is handled correctly and in compliance with these instructions.**

Inside View**

**STERILIZING FUNCTION**

1. Plug in the sterilizer.
2. Fill the metal heater with 120-140 ml (4-4.75 oz) of water

**Note: Always pour the water directly onto the heating plate.**  
**Note: If the water level is too low, the unit will stop automatically.**

3. Place the bottle tube on top of the filled base.

**Note: Do not place the bottles directly into the sterilizer base.**

4. Place the bottles onto the bottle grips in the bottle tube.
5. Place the nipple shelf on top of the bottle tube.
6. Place your bottle caps and nipples onto the top shelf.

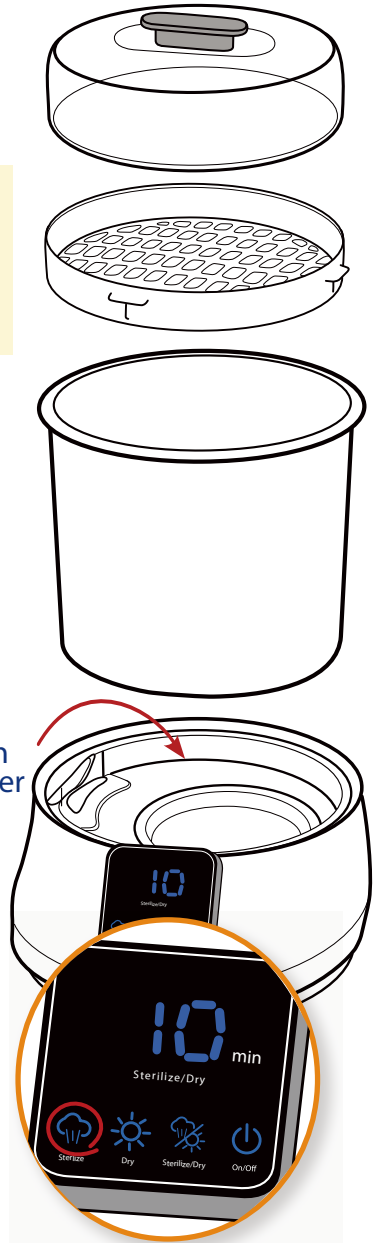

**Note: The sterilizer can hold 6-8 bottles with bottle caps and nipples.**

7. Place the sterilizer lid over the shelf.
8. Tap the power icon to turn on the sterilizer.
9. Tap the sterilizing icon. The time will be displayed and a countdown will begin.
10. The sterilizer is finished in about 10 minutes. The sterilizer will beep when completed.

**Note: To stop the sterilizing process in middle, tap the power icon.**

11. Use the handle on the lid to lift the lid after use.

**CAUTION: Hot steam will escape from the sterilizer!**

**DRYING FUNCTION:**

1. Plug in the appliance.
2. Place the bottle tube on top of the base.

**Note: Do not fill the base with water.**

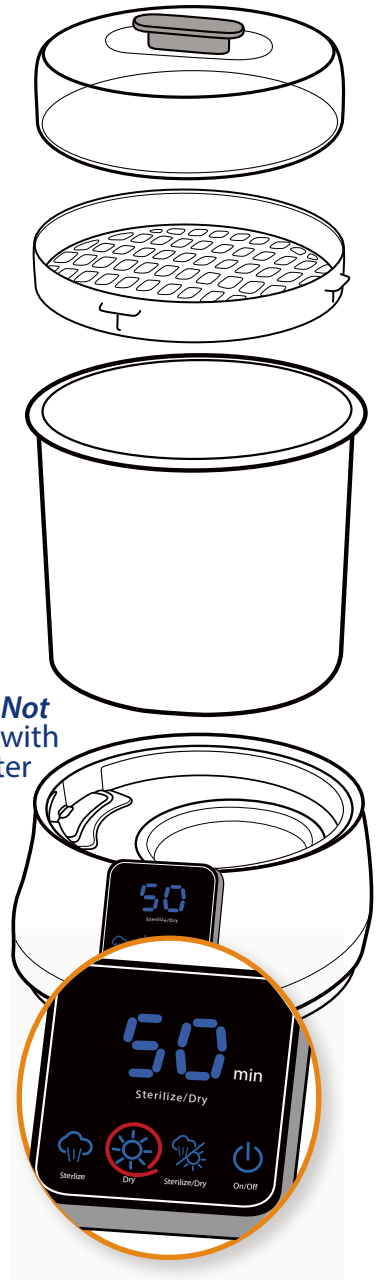

**Note: Do not place the bottles directly into the sterilizer base.**

3. Place the bottles upside down into the bottle tube.

**Note: Make sure the bottle mouths are placed over the raised vents**

4. Place the nipple shelf on top of the tube.
5. Place bottle nipples and caps on the shelf.
6. Place the sterilizer lid over the shelf.
7. Tap the power icon to turn on the sterilizer.
8. Tap the drying icon, the icon will light up. The display screen will show the amount of time and the sterilizer will start counting down. The drying function can be set for 30, 40, or 50 minutes. Tap the drying icon twice to change the time. The time will appear on the display screen and will start counting down.
9. The sterilizer will beep when completed.
8. Use the tongs to remove all the objects from the sterilizer.

**Do Not Fill with water**

**CAUTION: The sterilizer and objects inside are still hot use caution when removing!**

**STERILIZER & DRYING FUNCTION:**

1. Plug in the appliance.
2. Fill the metal heater with 120-130 ml (4-4.4 oz) of water.
3. Place the bottle tube on top of the base

**Note: Do not place the bottles directly into the sterilizer base.**

**Note: Always pour directly into the heating plate.**

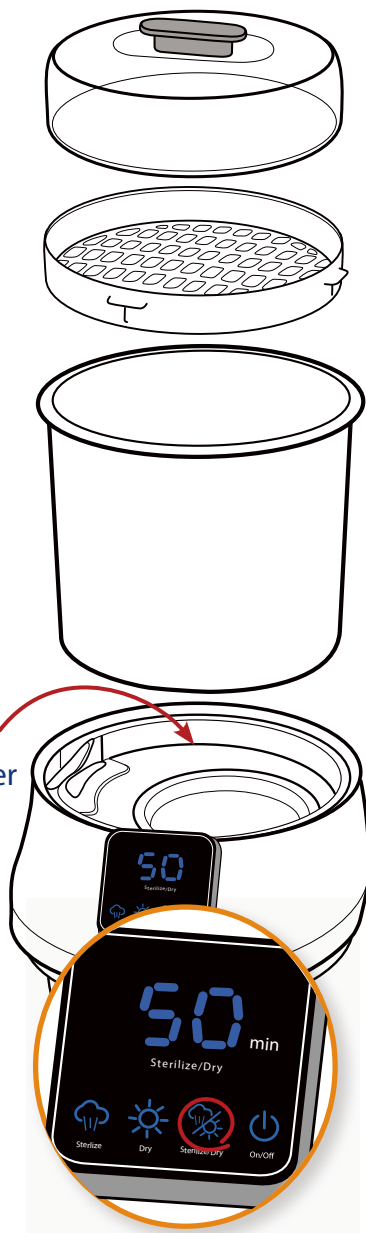

4. Place the bottles upside down into the bottle tube.

**Note: Make sure the bottle mouths are placed over the raised vents**

5. Place the nipple shelf on top of the tube.
6. Place bottle nipples and caps on the shelf.
7. Place the sterilizer lid over the shelf.
8. Tap the power icon to turn on the sterilizer.
9. Tap the sterilizer/drying icon, The display will show 50 minutes. Press the icon again to change between 40, 50, and 60 minutes. In each, the sterilize cycle will take approximately 10 minutes. After choosing the desired setting, wait a few seconds, and the countdown will begin.

10. The sterilizer will beep when completed.

**If there is still water left in the heating element before the drying cycle, use 10 ml (1/3 oz) water less for your next use.**

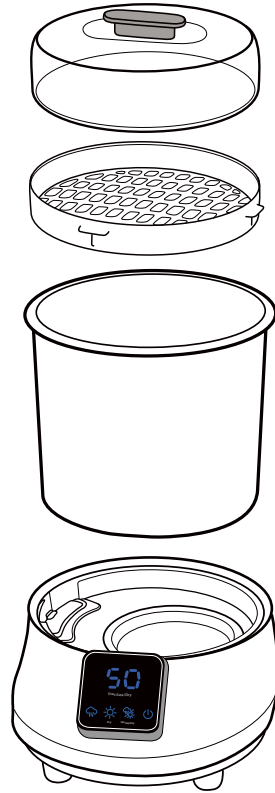

**Note: You can cook using the steam from the sterilize function by placing food on the nipple shelf.**

## CLEANING AND MAINTENANCE

*Before cleaning the appliance make sure the appliance is completely cooled off and unplugged.*

1. Clean the appliance after each use. Use a soft non abrasive sponge. Do not use steel wool or any abrasive sponge to clean the appliance.
2. Never immerse the sterilizer base in water.
3. Do not use bleach or any chemical disinfecting solutions to clean the appliance.
4. All components but the base are dishwasher safe. Only use the top rack of the dishwasher!

### Storage

- Before storing the appliance empty all the water.
- Before storing the appliance, make sure that all parts are clean and dried.
- To prevent discoloration, do not use this warmer in direct sunlight.
- After using the appliance you can use the cord storage to store the cord until next use.

## Troubleshooting, Tips, and FAQs

*Here are some frequently asked questions:*

1. **Why is there a range for the sterilizing water volume?**
  - a. There are many environmental conditions that can affect how quickly your water boils. The first time that you use your product, fill it with bottles and accessories as you normally would, then use 120 ml. If your cycle ends before 10 minutes, use 130-140 ml.
  - b. On the other hand, if your unit has a great deal of water left in the heating plate after sterilizing, try using 10 ml less water next time. (Don't go below 120 ml)
  
2. **I used the recommended amount of water, but my sterilizing cycle keeps ending early.**
  - a. See the answer to question 1.
  - b. If you still have the same issue, these may be the causes:
    - i. Please use the measuring cup provided to measure water.
    - ii. Make sure you are placing your sterilizer on a level surface. If it isn't, the water may not stay over the heating element.
    - iii. Make sure that you are pouring your water directly onto the metal heating element. Don't pour the water to the side or pour through the bottle holder.
  
3. **Should I remove the lid right after sterilizing?**
  - a. No, you must let the steam dissipate after the cycle is complete. Wait 2-3 minutes after sterilizing.
  
4. **How should I organize items in the sterilizer?**
  - a. **Don't pack objects tightly. Steam must reach every surface of your items. Place bottles upside down.**

## **WARRANTY & SERVICE**

This Limited Warranty is for one full year from the date of purchase. It is applicable to the original purchaser only and is not transferable to a third party user. Repair or replacement of defective parts is solely at the seller's discretion. In the event that repair isn't possible, the seller will replace the product/part. If product repair/replacement won't suffice, the seller has the option of refunding the cash value of the product or component returned.

Product defects not covered under the Warranty provisions include normal wear and damage incurred from use or accidental negligence, misuse of instruction specifications or repair by unauthorized parties. The manufacturing company is not liable for any incidental or consequential damages incurred by such circumstances.
